BORANEX MIDDLE EAST TRADING LLC

Engineering solutions for Iraq & the GCC since 1998. Every page of this brochure links to a category, a specification or a way to reach our team.

boranex.com · boranex@boranex.com

On the ground since 1998.

Boranex Middle East Trading LLC is an engineering solutions provider serving the oil & gas, water and electricity sectors across Iraq and the wider region. As the exclusive dealer in Iraq for numerous recognised industrial brands, we deliver complete project support — supply, installation, commissioning, training, warranty, ongoing maintenance and after-sales support.

AUTHORISED REPRESENTATION

All product names, logos and
brands are property of their
respective owners and are used by
Boranex in its capacity as an
authorised representative.Genuine spare parts for all
supported brands — see p. 22.

Built around what you lift.

Every equipment category we supply is backed by an authorised manufacturer partnership — with supply, commissioning, training, spare parts and support handled by Boranex on the ground.

Mobile Cranes

All-terrain, rough-terrain, truck-mounted and carrydeck cranes — from 25 t site workhorses to 450 t heavy lifters.

GROVE · TEREX FRANNA

→ P. 8

Crawler Cranes

Lattice-boom and telescopic crawlers for foundations, energy and heavy industrial work — 80 t to 110 t and beyond.

MANITOWOC · SENNEBOGEN

→ P. 14

Boom Trucks & Loader Cranes

Commercial-chassis boom trucks from 9.1 t to 50 t — plus Hiab knuckle-boom loader cranes.

NATIONAL CRANE · ALTEC · HIAB · PM

→ P. 15

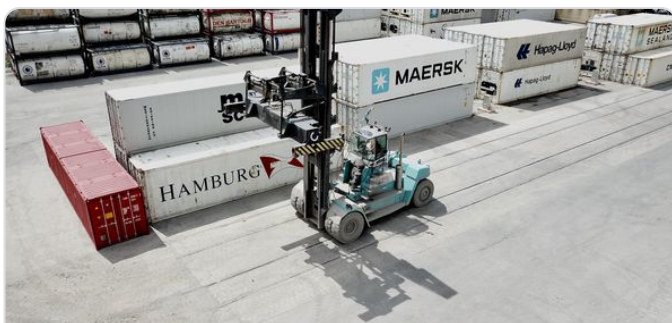

Overhead Cranes & Hoists

Industrial, workstation and hazardous-environment lifting for critical production lines.

KONECRANES

→ P. 16

Port & Container Handling

Mobile harbour cranes, reach stackers, lift trucks and terminal tractors for every cargo flow.

KONECRANES · TERBERG

→ P. 18

Pick & Carry Cranes

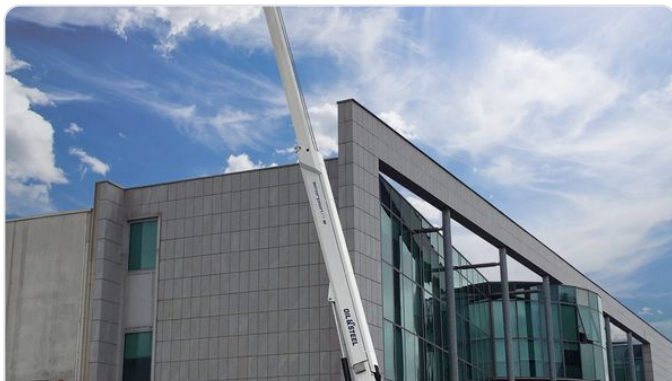

No outriggers. No setup time. Terex Franna lifts, travels with the load and places it — built for base logistics, plant maintenance and tight compounds.

TEREX FRANNA

→ P. 12

03 / WHAT WE SUPPLY

Access, municipal, utility, tyres — and the parts behind them.

Aerial Access Equipment

Telehandlers, scissor lifts, boom lifts and truck-mounted platforms.

JLG · HAULOTTE · PM

→ P. 19

Municipal & Environmental

Sweepers, sewer cleaners, vacuum loaders and water blasters.

ELGIN · VACTOR · GUZZLER · JETSTREAM

→ P. 20

Utility & Grid

Insulated washers and cable-handling equipment for live-line work.

ALTEC

→ P. 21

OTR Tyres

Specialised off-the-road tyres for machinery working in extreme conditions.

BRIDGESTONE

→ P. 21

Genuine Spare Parts

We don't just sell equipment. Boranex supplies genuine spare parts for all supported brands — backed by after-sales teams in Dubai, Baghdad and Basra.

ALL SUPPORTED BRANDS

→ P. 22

ENQUIRIES

One enquiry, every category.

Model ranges, capacities and dimensions are indicative manufacturer figures, shown for orientation only and subject to change without notice; the manufacturer’s current specification and load charts govern any supply.

04 / MOBILE CRANES — GROVE ROUGH-TERRAIN

Built for the site itself.

Grove rough-terrain cranes are built for the harshest jobsites — soft ground, tight pads and pick-and-carry work — with MAXbase outrigger positioning and CCS controls across the range.

MODEL	CAPACITY	MAIN BOOM	MAX TIP
GRT540	40 t	31 m	47 m
GRT655	51 t	34.8 m	51.8 m
GRT655L	51 t	43 m	59.7 m
GRT765	65 t	38.5 m	58.5 m
GRT780	80 t	47.3 m	67 m
GRT8100-1	100 t	47 m	72.9 m
GRT8120	120 t	60 m	80.8 m
GRT9165	150 t	62.5 m	91.1 m

04 / MOBILE CRANES — GROVE CARRYDECK

Compact by design.

Grove carrydeck industrial cranes are made for plant maintenance and confined-space material handling — compact dimensions, multi-mode steering and true pick-and-carry decks.

MODEL	CAPACITY	MAIN BOOM	MAX TIP
GCD09	8.1 t	10.12 m	14.6 m
GCD15	13.6 t	15.4 m	21.18 m
GCD20	18 t	16.6 m	26.2 m
GCD25	22 t	21.6 m	29 m

04 / MOBILE CRANES — GROVE TRUCK-MOUNTED

Lifting at highway speed.

Grove truck-mounted cranes pair long-reach, high-capacity booms with highway travel speeds — quick set-up on arrival and fast moves between jobs.

MODEL	CAPACITY	MAIN BOOM	MAX TIP
TMS875-2	75 t	39 m	59.2 m
TMS800-2	77 t	39 m	59.2 m
TMS9000-2	100 t	51.6 m	79.3 m
TTS9000-2	100 t	51.6 m	79.3 m

04 / MOBILE CRANES — GROVE TRUCK CRANES (TMC)

Full-power booms on commercial carriers.

Grove TMC truck cranes put full-power booms on rugged commercial carriers — cost-efficient lifting with fast road travel between sites, from the compact TMC 120 to the 100 t TMC 1000.

MODEL	CAPACITY	MAIN BOOM	MAX TIP
TMC 120	12 t	28 m	28.5 m
TMC 250	25 t	43 m	52.5 m
TMC 550	55 t	45 m	61 m
TMC 750	75 t	48 m	65.7 m
TMC 1000	100 t	60 m	78 m
TMC 1000E	100 t	49.5 m	66 m

Model ranges, capacities and dimensions are indicative manufacturer figures, shown for orientation only and subject to change without notice; the manufacturer’s current specification and load charts govern any supply.

NEW

05 / PICK & CARRY CRANES — TEREX FRANNA

No outriggers. No setup time.

Terex Franna pick & carry cranes lift, travel with the load and place it — one machine covers lifting, carrying and placement inside plants, bases and tight compounds.

PATH TO EVALUATION

- 01 Technical assessment for customer needs
- 02 Pricing and configuration alignment
- 03 Operational & technical support
- 04 Deployment of unit and full training provided

01 Fast setup lifting

No outriggers means immediate lift, move and placement — traditional RT and mobile cranes often need outriggers, setup time and space.

02 Travels with the load

Moves loads across a site without a secondary vehicle — a unique advantage of the pick & carry concept.

03 Manoeuvrable when loaded

Articulated steering keeps the crane working in very compact areas while carrying a load.

04 Reduced fleet complexity

One machine covers many tasks — generators, containers and palletised loads, vehicle component changes, construction support and yard housekeeping.

Franna created the modern pick & carry crane in Australia in 1980 and has led the segment for more than 40 years — part of Terex since 1999, a U.S. corporation manufacturing since 1933, with strong governance, safety culture and international compliance, including export controls.

05 / PICK & CARRY CRANES — TEREX FRANNA

Safety, support and the Boranex advantage.

TEREX FRANNA AT 22-2

TEREX FRANNA MAC 25-5

TEREX FRANNA AT 40-2

KEY SAFETY FEATURES

- Dynamic load monitoring system
- Safety radar with real-time load monitoring
- Overload protection devices
- Safety interlocks
- Emergency stop button
- Audible and visual warning devices
- Anti-slip surfaces and handrails
- Operator cabin visibility
- Full operator training and certification

SUPPORT & TRAINING

- 01 On-ground service partner**
Boranex technicians are trained by Terex in hydraulics, LMI and diagnostics — first response within Iraqi territory, no cross-border delays.
- 02 Critical parts held locally**
Local parts stocking dramatically reduces downtime and keeps maintenance predictable.
- 03 Operator training**
Operator coaching customised to your site conditions, plus remote support and full digital Terex manuals.

ADD-ONS FOR MULTI-USE APPLICATIONS

- 01 Man basket**
Safe, elevated work access for maintenance — a fully integrated attachment that expands the unit's utility.
- 02 Spreader bar**
Telescopic design for heavier, wider loads — improved sling angles for tall or awkward lifts.

NEXT STEP

Start with a technical assessment.

Tell us the site, the loads and the tasks — we assess the fit, align configuration and pricing, and plan deployment and training.

Hiab — knuckle-boom loader cranes

Hiab pioneered the truck-powered hydraulic loader crane in Sweden in 1944; more than half a million Hiab loader cranes have since been delivered in over 120 countries. Its knuckle-boom cranes fold and articulate to load and unload directly from the carrying vehicle — supplied by Boranex as truck-mounted loader crane solutions.

HIAB LOADER CRANE

PM — truck-mounted knuckle-boom cranes

PM has built truck-mounted hydraulic knuckle-boom cranes in Modena, Italy since 1959 — the first Italian manufacturer in the field — completing the loader-crane offering with the same truck-mounted flexibility for delivery and site work.

PM KNUCKLE-BOOM CRANE

From 250 kg to 1,000 tonnes.

Konecranes overhead cranes utilise the latest technology and represent the most advanced crane functionality on the market — from a single hoist to a complete process crane, including workstation lifting systems for light loads and cranes and hoists for hazardous environments.

250 KG — 5 T

Chain hoist cranes — C-series

Light-duty lifting for workshops and production lines

UP TO 80 T · 160 T TWIN

Rope hoist cranes — X · S · CXT series

New-generation X-series; synthetic-rope S-series; proven CXT family

UP TO 12.5 T

Gantry cranes

Ground-running rails where building support is limited

UP TO 6.3 T

Portable crane — CXT Explorer

A full overhead crane that relocates from site to site

UP TO 10 T

Wall-mounted console cranes

Serve the workspace under a main overhead crane

UP TO 500 T · 1,000 T TWIN

Open winch cranes — M · SMARTON · SM

Heavy process and assembly duty; SM up to 500 t on one trolley

Konecranes — headquartered in Hyvinkää, Finland, with around 16,500 employees in some 50 countries — is a world-leading group in lifting and material handling.

Lift trucks, 10 to 80 tonnes.

Konecranes lift trucks are built for the world — forklifts and container handlers adapted to specialised material handling and the harshest container-handling conditions. Liftace models are the former Terex lift-truck line, now part of Konecranes.

09 / PORT & CONTAINER HANDLING

Every cargo flow, quayside to gate.

Konecranes Gottwald — mobile harbour cranes

Konecranes Gottwald mobile harbour cranes provide versatile, economical handling of every cargo category — serving every type and size of vessel in portal harbour, rubber-tyred and on-barge configurations, built on more than 70 years of mobile harbour crane technology.

GOTTWALD MOBILE HARBOUR CRANE

Yard automation & shipyard cranes

Konecranes leads container-yard automation — technology backed by build quality, delivery excellence, commissioning professionalism and service. Konecranes shipyard cranes bring the same expertise to shipbuilding processes.

Reach stackers — two lines

Reach stackers come in two lines — Konecranes SMV and Konecranes Liftace, the former Terex line — both supplied and supported by Boranex, alongside forklifts and container handlers.

KONECRANES SMV 4632 TC5

KONECRANES LIFTACE 4532 TC5 (FORMERLY TEREX)

Terberg — terminal & special tractors

Terberg tractors stand out for robustness, low fuel consumption, easy maintenance and driver comfort — with Terberg Rosroca and Dennis Eagle covering refuse-collection applications. Royal Terberg Group has been family-owned since 1869 and delivered its first terminal tractor to the Port of Rotterdam in 1973.

10 / AERIAL ACCESS EQUIPMENT

Reach up. Reach over. Work safely.

Telehandlers, scissor lifts, boom lifts and truck-mounted platforms — with operator training and support from Boranex.

JLG TELEHANDLER

JLG ARTICULATING BOOM LIFT

JLG SCISSOR LIFT

HAULOTTE ARTICULATING BOOM

JLG — telehandlers, scissor lifts & boom lifts

JLG — an Oshkosh Corporation company — covers the full access range: telehandlers with single-joystick control, long-life scissor lifts for indoor and outdoor work, and engine, hybrid and electric boom lifts including articulating, telescopic, compact-crawler and Toucan mast types. Founded in 1969 by John L. Grove — the same Grove behind Grove cranes.

Haulotte — articulating booms

Haulotte articulating booms provide up-and-over reach for skilled trades — compact platforms that work indoors and out. With roots reaching back to 1881, Haulotte is Europe's leading aerial-platform manufacturer, present in over 150 countries.

Oil&Steel (PM) — truck-mounted platforms

Oil&Steel truck-mounted aerial platforms complete the range — vehicle-mounted access for maintenance and utility work at height, from the aerial-platform arm of Italy's PM group, building truck-mounted lifting equipment since 1959.

Four Federal Signal specialists.

Boranex supplies the municipal and environmental range of Federal Signal Corporation — an NYSE-listed American group founded in 1901 — four specialist brands covering sweeping, sewer cleaning, industrial vacuum and high-pressure water blasting.

STREET SWEEPERS

Elgin

North America's largest street-sweeper manufacturer — sweepers for every application, from residential streets to airports, ports and industry, with over 100 years of engineering behind mechanical, vacuum, regenerative-air, waterless and CNG sweepers.

SEWER CLEANERS & VACUUM EXCAVATORS

Vactor

The name professionals turn to for combination sewer cleaners, catch-basin cleaners, jetters and vacuum excavation trucks — purpose-built durability and reliability.

INDUSTRIAL VACUUM LOADERS

Guzzler

Industrial vacuum loaders that recover, contain and carry solids, dry bulk powders, liquids, slurries and thick sludge from hard-to-reach areas.

HIGH-PRESSURE WATER BLASTING

Jetstream

An industry benchmark in high-pressure industrial water blasting — safer hands-free cleaning, surface prep, hydro-demolition and hydrostatic testing, with water blasters, valves, nozzles and abrasive cutting systems.

Live-line work and extreme-duty tyres.

Altec — insulated washers & cable handling

Altec insulated washers are the world's foremost hot-line insulator washers — in use in over 30 countries, from Saudi heat to North Slope cold. Altec cable-handling equipment spans chassis-mounted and trailer-mounted configurations for underground and overhead work. Family-led since 1929 and headquartered in Birmingham, Alabama, Altec delivers products and services in more than 100 countries.

13 / SERVICES & SPARE PARTS

With you for the whole lifecycle.

Boranex delivers complete project support — from specification to the years after handover — with technical teams in Dubai, Baghdad and Basra.

01 Supply

The right machine, specified for your site and sourced through authorised channels.

03 Training

Operator and technical training tailored to your crews and conditions.

05 Maintenance Services

Ongoing maintenance and technical support that keeps uptime up.

02 Installation & Commissioning

Delivered, installed and commissioned by our technical teams.

04 Warranty

Manufacturer-backed warranty, honoured locally.

06 Spare Parts & After-Sales Support

Genuine spare parts for the brands we support — with after-sales backup long after handover.

GENUINE SPARE PARTS

We don't just sell equipment.

Boranex supplies genuine spare parts for all supported brands — backed by after-sales teams in Dubai, Baghdad and Basra.

14 / WHO WE SERVE

Trusted where it matters most.

The segments Boranex supplies and supports across Iraq and the GCC.

01

Government & State

Iraqi ministries, state companies, local governments and municipalities.

02

International Oil Companies

BP – Iraq, Rumaila Operating Organisation (ROO), Shell, ExxonMobil, TotalEnergies, Basra Energy and other operators.

03

Prime Contractors

KBR, Halliburton, Baker Hughes, Weatherford, OILSERV, Amentum and other leading contractors.

04

Kurdistan Region

Foreign firms and operators active across the Kurdistan region of Iraq.

05

Leasing Companies

Foreign and local leasing entities, supplied to their exact requirements.

06

Private Sector

Local companies and contractors — new and used units to suit the job and budget.

Let's spec your next lift.

Tell us what you need to lift, move or maintain — our team will come back with the right machine, specification and support plan.
